

DISINFECTING HARD, NON-POROUS SURFACE PROCEDURES

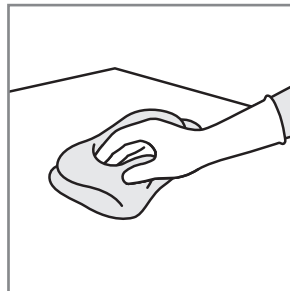

Ensure an everywhere clean. If used on a food-contact surface, customer must rinse then sanitize with food contact sanitizer post-disinfection.

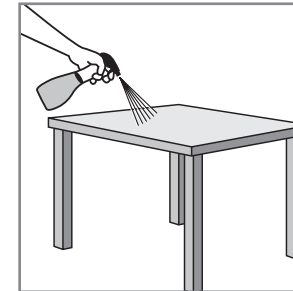

HERE'S HOW TO PRACTICE SANITIZING OF HARD, NON-POROUS SURFACES:

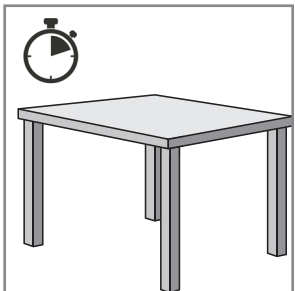

1. WEAR
protective gloves.

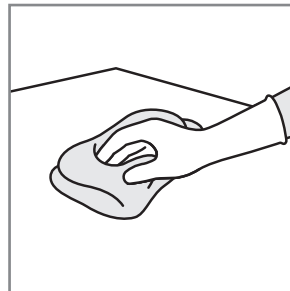

2. PRE-CLEAN
visibly soiled areas
to be disinfected.

3. TO DISINFECT,
apply product use
solution with a cloth,
mop, sponge, by
coarse spray or
soaking on hard,
non-porous surfaces
making sure to wet
thoroughly.

4. ALLOW SURFACE
to remain wet for
the time indicated in
the directions for
use on the
product label.

5. WIPE
the surfaces or allow
to air dry.

Apply product to high-touch surfaces such as doorknobs, light switches, faucets, counter tops, tables, chair armrests, etc.

NOTE: For an emerging viral pathogen, use a disinfectant with EPA-Approved Emerging Pathogen Claim. Contact your ProGuard representative for a complete list of products. Refer to the product label for complete directions for use including appropriate concentration, application method and contact time.

DISINFECTING HARD, NON-POROUS SURFACE PRODUCTS

DISINFECTING PRODUCTS
